Educational Journey to China

Short Conception

Starting point and objectives

China – A state in change. Like no other country before, China is going through great social and economical changes. To understand and critically reflect these changes and to get to know innovative solutions are some of the goals of our educational journey. In the same way we hope to establish partnerships.

The journey should encourage every participant's personality and should allow them to gain their own interpretation of China – A country like no other.

For this purpose the students will participate in the following program modules:

Program modules

Studies meet Science

Discourse with Chinese universities, their professors and students.

Studies meet Culture

Exchange about different point of views of different nations of the world via visitation of facilities and expositions together with Chinese Students.

Studies meet Politics

Visit of the German Embassy, discussion with embassy employees and Chinese officials.

Studies meet Practice

We provide our students with the opportunity to make private appointments with all of our contacts during the journey.

Studies meet Economy

We will visit German and Chinese Companies and will be searching professional exchange.

Three points that make this journey special

- The journey is solely planned and organized self dependent by students.
- The participating students are able to make hands-on experiences that others only come to know in working age.
- The participants gain insight into a country which is so often misunderstood.

Target group

15 highly China-interested students of the Technical University of Dresden are going to visit China. Everyone is allowed to apply for participation.

Time flow

Date	Activity	Place
13.09.2010 (Mon)	Flight Berlin – Shanghai	Berlin
14.09.2010 (Tue)	Flight, move into accommodations, Team-Meeting	Shanghai

Organizer and project team

The journey will be voluntary and decentrally organized by dedicated students. In the process the participants will independently undertake different tasks. The journey will be accompanied by Prof. Dr. Gerd-Axel Ahrens, professor for traffic- and infrastructure planning.

The central coordination is done by Verkehrte Welt e.V., an association for international study exchanges in the field of transport and transportation sciences. Our association was officially founded on April 29th 2003. We do not depend on any umbrella association and organize our events as dedicated students with humanitarian involvement.
